Guide on the use of generative AI.

"This document provides preliminary guidance to federal institutions on their use of generative AI tools. This includes instances where these tools are deployed by federal institutions. It provides an overview of generative AI, identifies challenges and concerns relating to its use, puts forward principles for using it responsibly, and offers policy considerations and best practices. This guide also seeks to raise awareness and foster coordination among federal institutions. It highlights the importance of engaging key stakeholders before deploying generative AI tools for public use and before using them for purposes such as service delivery. These stakeholders include legal counsel, privacy and security experts, and the Office of the Chief Information Officer at the Treasury Board of Canada Secretariat (TBS)"--Overview.
