**Accelerating AI Innovation and  
Discovery through the National AI  
Research Resource (NAIRR) Pilot**

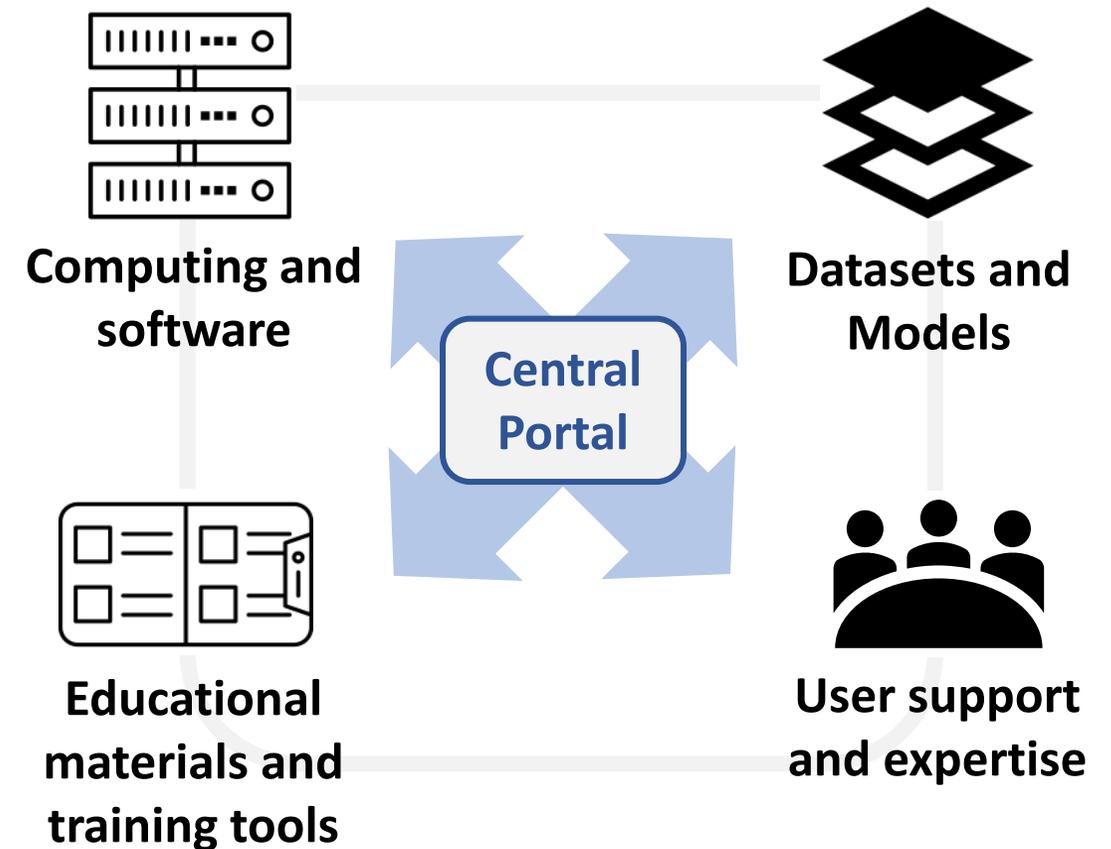

Katie Antypas  
Office Director, Office of Advanced Cyberinfrastructure  
National Science Foundation  
NAIRR Pilot Inaugural Meeting  
February 2025  
NAIRR Pilot

# NAIRR Vision: A national research infrastructure to drive US AI innovation, discovery and national competitiveness

## National goals

- Accelerate AI and AI-powered discovery and innovation.
- Expand the US AI R&D workforce and train the next generation of AI researchers and educators.
- Increase integration and use of world-class public and commercial AI resources.
- Advance public trust in AI

## Envisioned NAIRR Architecture

# NAIRR Pilot: history and timeline to date

- Jan 2021 National Artificial Intelligence Initiative Act of 2020\* directs NSF and OSTP to convene a **Task Force** on the feasibility of a National AI Research Resource.
- Jan 2023 The NAIRR Task Force delivers an ambitious **implementation plan** and suggests starting a pilot.
- Jan 2024 NSF and OSTP launch the **NAIRR Pilot** with agency, industry and non-profit partners
- Jan 2025 The NAIRR Pilot is now serving **hundreds of researchers and educators** with compute, data, model, and educational resources at all scales.

DARPA

DOD

DOE

DoEd

FDA

NASA

NIH

NIST

NOAA

NSF

USDA

USGS

USPTO

VA

### Computing

NSF and DOE

10+ advanced computing systems at national and extreme scales.

### Datasets & Models

DoD DOE NASA NIH NOAA  
USDA USGS USPTO

25 open datasets, models, platforms and more available on NAIRR Pilot Portal. Increasing integration with compute

### NAIRR Secure

Leads: DOE and NIH

Three demonstration projects underway, coordinated through NAIRR Secure WG

### Platforms, Software, Educational materials

Multiple agencies

Software Workshop (NSF and DOE lead).  
Education materials and tools

### Governance

All contributing agencies

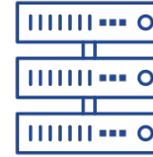

- Steering Committee
- Pilot Program Management Office
- Data/Models, Secure & Education/Outreach WGs

# 26 industry and non-profit partners are contributing *in kind* state-of-the-art resources

- AI2: Allen Institute for AI
- AMD
- Amazon Web Services
- Anthropic
- Cerebras
- Databricks
- Datavant
- EleutherAI
- Google
- Groq
- Hewlett Packard Enterprise
- Hugging Face
- IBM
- Intel
- Meta
- Microsoft
- MLCommons
- NVIDIA
- Omidyar Networks
- OpenAI
- OpenMined
- Palantir
- Regenstrief Institute
- SambaNova Systems
- Vocareum
- Weights & Biases

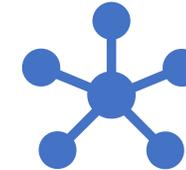

## ***Research Resources***

Computing

Datasets

Models, software, platforms

Educational/training opportunities

Collaborations

# Pilot Year 1: We built the key foundations needed for a full NAIRR

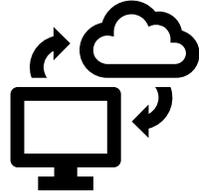

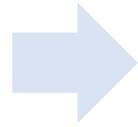

## Establish strong gov- industry partnership

*A new multi-lateral model based on voluntary in-kind contributions to bring the most advanced resources to US researchers*

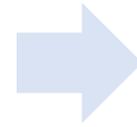

Results

**14** agencies  
**26** industry and non-profit partners

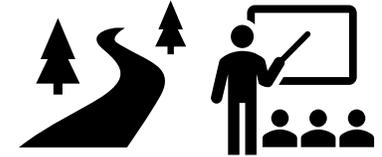

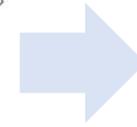

## Integrate & deliver contributed resources

*Back-end operations to exploit and track all contributed resources: compute, data, models, expertise*

## Establish single access point for US users

*Portal deployment, request process, onboarding, resource matching, support, training*

## Expand AI research & education pathways

*Technical Demo Projects, NAIRR Secure, NAIRR Classroom, community workshops & outreach, data set contributions*

**600+** requests to date  
**275+** approved projects underway in **43** states

Initiated **over 20** funded projects and pilots  
--> **Focus of Y2**

NAIRR Pilot  
Portal

## CLASSROOM AND EDUCATOR RESOURCES

Request access to educational platforms (such as Jupyter notebooks).

Apply

## RESEARCHER RESOURCES

Request access to advanced computing, cloud computing, models, software, platforms, and collaborations.

Apply

## DATA, MODELS, AND MORE

Additional government and government-funded resources that do not require an application.

## NAIRR Pilot

National Artificial Intelligence  
Research Resource Pilot

INAUGURAL ANNUAL MEETING

FEBRUARY 19-21, 2025

Hyatt Regency Crystal City, Arlington, Va

BROUGHT TO YOU BY INTERNET2

# Insights and Lessons From Year 1

## **The public-private partnership model is VERY advantageous.**

- Delivers a much richer array of resources and expertise compared to a public-only model.

## **High demand for the array of NAIRR Pilot AI resources.**

- Many research and education topics, use cases, and project sizes
- Ways of accessing compute may need to be faster and more interactive; consortia may be needed for the largest scales
- Demand for secure AI resources for sensitive data and uses cases.

## **Intensive coordination is key to connect partners, resources, and users**

- Constant contact, clear channels, and nimbleness have been key
- Significant appetite for workshops and training on using resources.

## **Access to trusted data and their integration are central challenges**

- Needs are very varied across projects and disciplines
- AI data infrastructure capabilities must be co-designed with communities and with specific use cases in mind.

## **Important to measure performance, impact, and success along the way.**

- A full NAIRR will need both near-term and longitudinal assessments
- Must identify and relieve pain points for users across NAIRR steps.

# Preparing for the full NAIRR at scale and speed

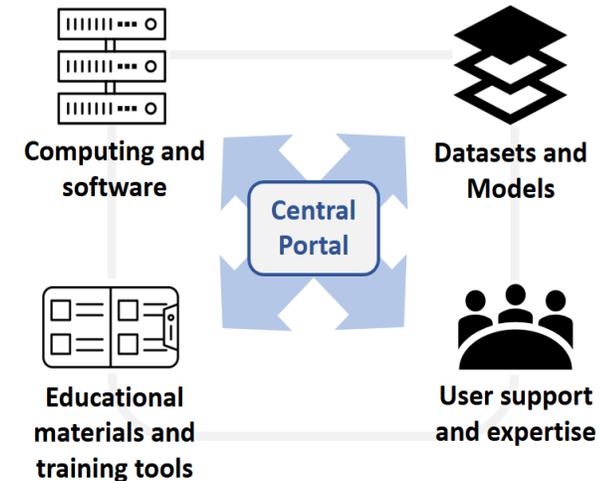

## National Goals

- Accelerate AI innovation
- Expand US AI workforce
- Provide world-class resources
- Advance Public trust in AI

## Key Performance Points

- Easily accessible resources via a portal.
- Seamless integration of data, models, software & compute.
- Extensive support via expertise and training.

## Vision for the Full NAIRR

## Pilot Year 2 Plan

- Finalize design and governance blueprint
- Augment user support, training and operational efficiencies
- Follow up on lessons learned
- Develop metrics for full NAIRR

# Full NAIRR Legislation in Process

- Legislation to fund the full NAIRR introduced in House on March 26, 2025
  - [H.R.2385: CREATE AI Act of 2025](#)
    - Referred to House Committee on Science, Space, and Technology
  - Disturbing language
    - Added to 15 USC 9401 et seq (Nat AI Act of 2020)
    - SEC. 5605 NAIRR FUNDING
    - “To carry out this title, to the maximum extent possible, the NAIRR is authorized to accept and use donations of cash, services and personal property from the private sector.”

The screenshot shows the CONGRESS.GOV website interface. At the top, there is a navigation bar with 'CONGRESS.GOV', 'Advanced Searches', and 'Browse'. Below this is a search bar with 'Legislation' selected and a dropdown menu showing 'Examples: hr5, sres9, "health care"'. A 'MORE OPTIONS' dropdown is also visible. The main content area shows the breadcrumb 'Home > Legislation > 119th Congress > H.R.2385' and the title 'H.R.2385 - CREATE AI Act of 2025' for the 119th Congress (2025-2026). A 'BILL' label is present with a 'Hide Overview' button. The details section includes: Sponsor: Rep. Obernolte, Jay [R-CA-23] (Introduced 03/26/2025); Committees: House - Science, Space, and Technology; Latest Action: House - 03/26/2025 Referred to the House Committee on Science, Space, and Technology. (All Actions); Tracker: A progress bar showing 'Introduced' as the current status, followed by 'Passed House', 'Passed Senate', 'To President', and 'Became Law'.

# State-of-the-Art Data Center

- The National Petascale Computing Facility (NPCF) is a state-of-the-art data center for research computing and data
  - 20,000 sq ft machine room
  - liquid cooling reduces utility costs, aids meeting "green campus" targets
  - 24 MW usable power (32 MW total in 4 x 8MW)
  - 400 Gb/s network bandwidth to Internet
  - cybersecurity for networking and systems
  - separate secure computing enclave within NPCF
  - UIUC updating cooling and power for part of space
- Great asset for UIUC and UI System
- Few if any universities in the US have anything like NPCF
