

PRIORITY AREAS FOR THE DEVELOPMENT OF ARTIFICIAL INTELLIGENCE TECHNOLOGIES IN UZBEKISTAN

STRATEGY FOR THE DEVELOPMENT OF ARTIFICIAL INTELLIGENCE

MINISTRY OF DIGITAL
TECHNOLOGIES OF THE
REPUBLIC OF UZBEKISTAN

-  Finance sector
-  Healthcare
-  Digital government
-  Agriculture and water management
-  Transport sector
-  Education

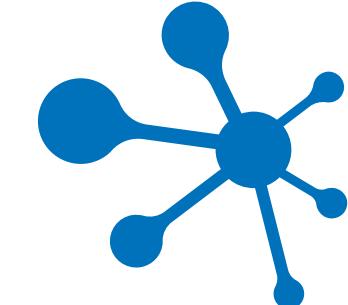

CENTER FOR THE DEVELOPMENT
OF ARTIFICIAL INTELLIGENCE
AND DIGITAL ECONOMY

High computing power management

Formation and management of data base

RESEARCH INSTITUTE FOR
THE DEVELOPMENT OF
DIGITAL TECHNOLOGIES
AND ARTIFICIAL INTELLIGENCE

Organizing studies in higher education institutions

Conducting scientific research

DATA POOL

HIGH-EFFICIENCY
CLUSTER

PLANNED PROJECTS

About 100 projects will be implemented

Large language models

Chatbots for government information systems

Large Uzbek language model

Electronic document formation system

Uzbek-speaking Muxlisa system

Yandex Alice who communicates in Uzbek

Determining tree cover

Determination of the number of animals at a distance

“UzFace” system

Detection of tobacco consumption in prohibited places

Forecasting agricultural crop yields

HoReCa

Identifying defects on production lines

COMPUTER VISION

Ensuring the safety of scooters

Waste identification

Early detection of arbitrary land acquisition and construction activities

Palm payment system

Determination of the condition of power lines

Fire and smoke detection system

Forecasting electricity consumption

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of barrier-free movement of the disabled with the help of robots

Detecting natural gas leaks

Ensuring the safety of scooters

Examination of the conditions of

INFRASTRUCTURE AND SKILLS DEVELOPMENT

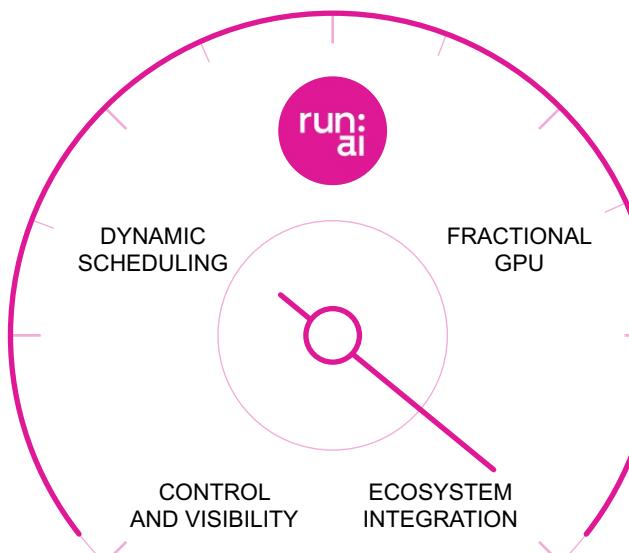

MINISTRY OF DIGITAL
TECHNOLOGIES OF THE
REPUBLIC OF UZBEKISTAN

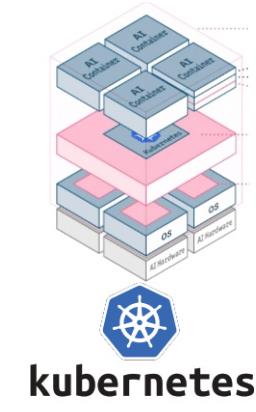

Direct access to memory via InfiniBand networks

Resource utilization through K8s orchestration tools and run: ai software product

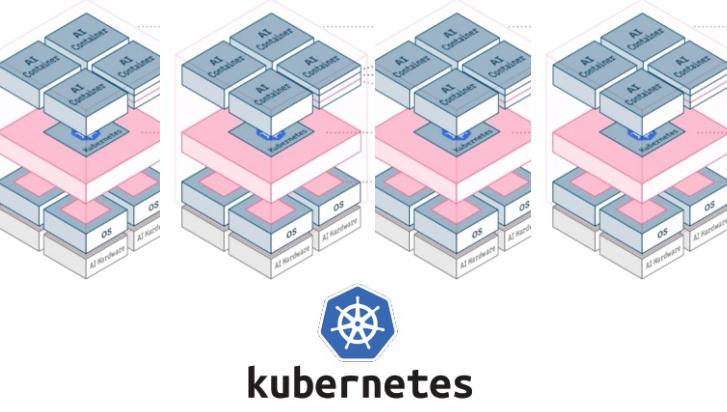

Small Cluster

Integrated environment for hosting artificial intelligence applications

Tender announcement
January 2025

Large Cluster

Integrated environment for hosting artificial intelligence applications

Delivery
April–May 2025

Resource leasing

Tender announcement
July 2025

Delivery
December 2025

International relations

ICT WEEK - 2025
23-26 September

Conference
in Samarkand
7-8 August 2025

30+ sessions

15 + sessions
software products
are being tested

International ranking
70th place

Strategy session

СБЕР
"School 21"
5 300+ students

"Yandex School of Programming"
1 240 students

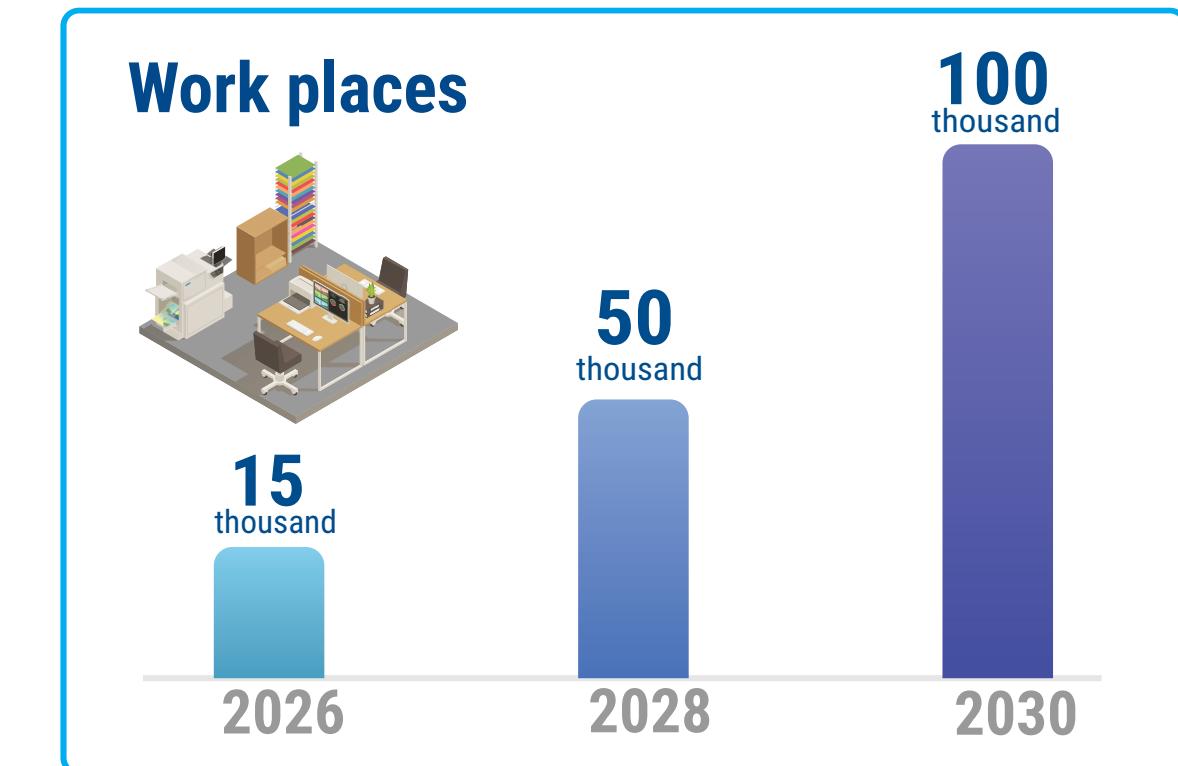

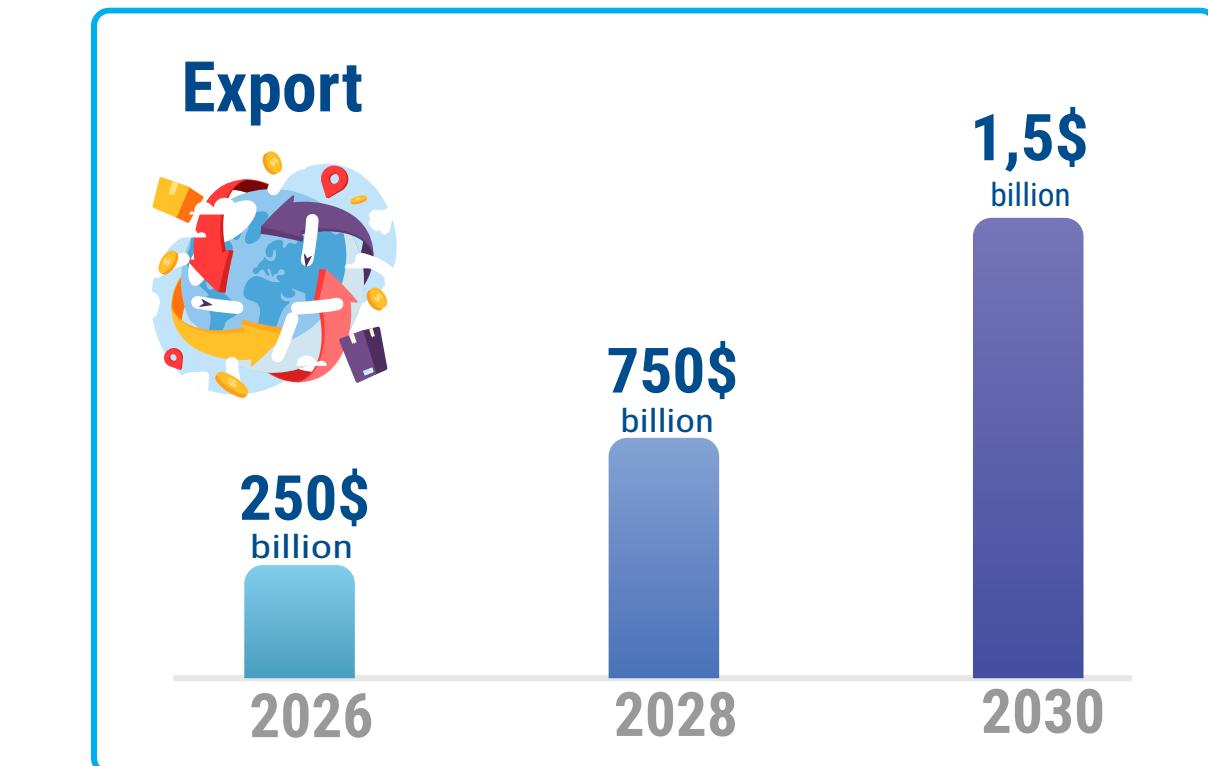

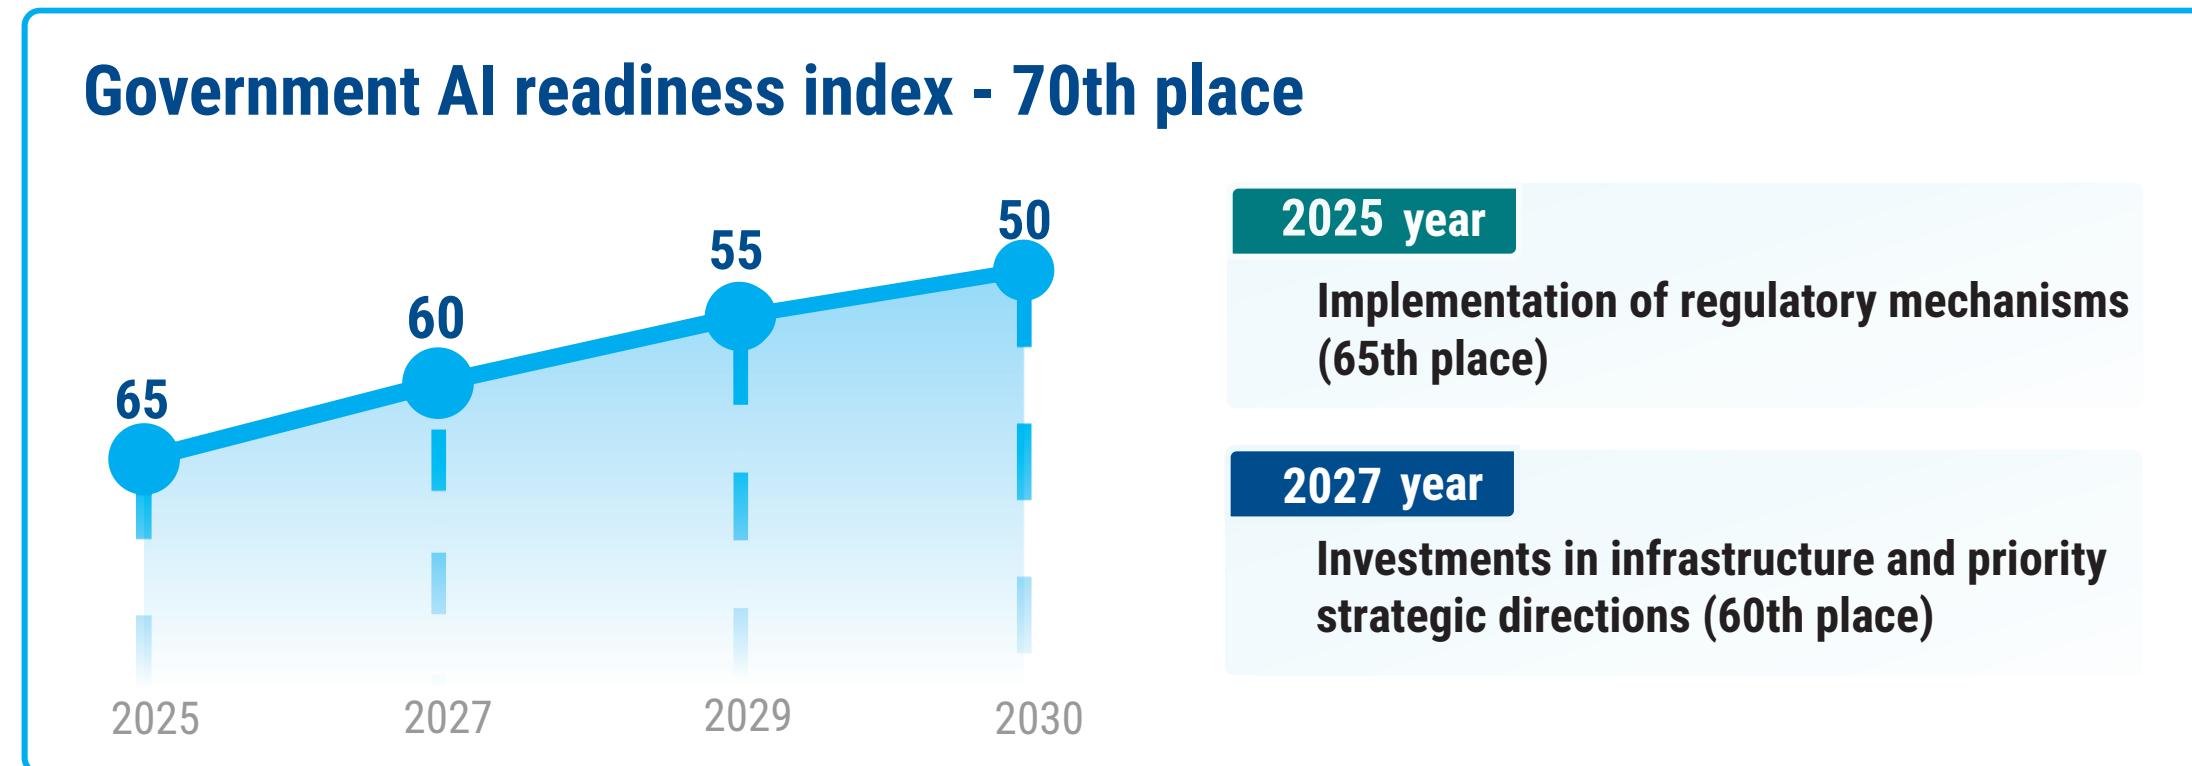

Yandex
Uzbekistan

700+ lessons

About 60 organizations,
400 + leaders and
courses for employees

TARGET INDICATORS

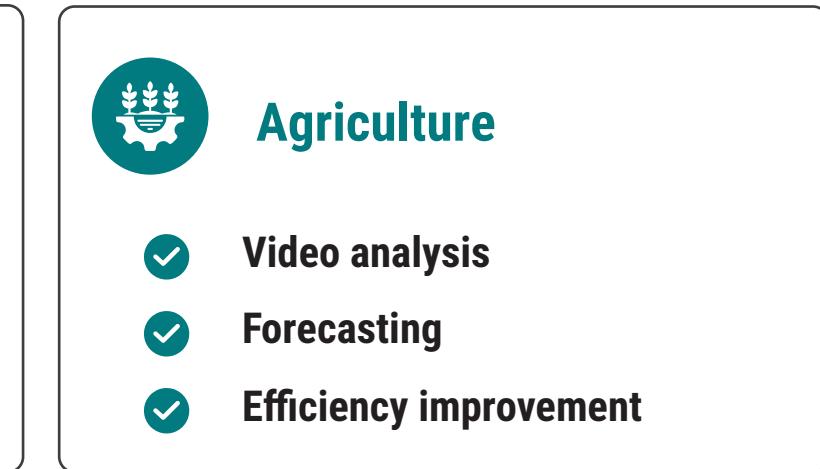

PROJECTS

Reducing the shadow economy

Improving production and efficiency

INFRASTRUCTURE

Creation of over 30 data pipelines between data sources and development infrastructure across various sectors

Training large language models

More than 3 million users

Cloud platform providing access to computing resources

Preparation of verified datasets
